

Post Graduate Year 2 Critical Care Pharmacy

Charleston Area Medical Center's PGY2 pharmacy residency is an ASHP accredited program. Our mission is to provide experiences that will allow the second-year resident to further refine the knowledge, skills, and attitudes required to pursue rational drug therapy in a collaborative environment for a critically ill patient population. The resident will also become proficient in conducting independent research in the critically ill patient. Upon completion of the specialty residency, the resident will have achieved a level of expertise in the critical care environment to function as a clinical specialist and to become a leader within the profession.
